

September 7, 2010

Attention Village of Anmore Council Members,

The August 31st Child Care Working Group meeting resulted with the directive for all Working Group members to compose a letter to Council regarding our individual and personal recommendation on how to proceed Child Care in Anmore.

My goal in participating in this Working Group was to provide factual, impartial information to assist and in guiding Council in their decision making process. In this manner, I believe my own personal opinion is irrelevant to this process. Given the dedication and various talents of members in the past (2006-2008) and present (2008 - present) Child Care Working Group, I am impressed with the research and information being provided to Council despite the logistical and time constraints often imposed on this process. I doubt there is any stone unturned in Child Care debate.

I urge Council to consider the information, and make their wise choice. I hope that whatever direction is chosen, that all Council members will put aside their preconceived notions and base their decision on the information provided. Once Council reaches a decision, I hope that the Council work together to bring the project to a conclusion one way or another.

Sincerely,

Leigh Scatchard
