

You're invited to a community information open house to learn more about the Metro North Transmission Study.

Date	Time	Location
Thursday, June 23, 2016	5:00 – 8:00 p.m. (One hour question and answer session at 7:00 p.m.)	Anmore Elementary School (Gym), 30 Elementary Road

The open house is a drop-in format, so you do not need to pre-register. A one hour question and answer session starts at 7 p.m.

We've been studying three alternatives as part of the Metro North Transmission Study and have identified one alternative (Alternative 2) for further study, technical work and consultation. Alternative 2 impacts fewer residents and property owners, has lower seismic and construction risks, and offers the best value in terms of capacity for the investment.

At this open house, members of the study team will provide you with updated information on a conceptual design of the power line upgrade along the existing right-of-way in Anmore, and other considerations as we do further study and technical work on this alternative.

For more information, please visit bchydro.com/mnt. We encourage you to email us at stakeholderengagement@bchydro.com if you have any questions and to sign-up for updates.
